Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As per claim 1:

- The claim recites “a same plane” in line 2 of the claim. It is unclear as to what the plane is the same as.
- The claim recites “changed to” in line 3 of the claim. The claim should positively recite the structure of the apparatus, not the fact that it has been changed from something else.
- The claim recites “at a predetermined angle” in line 3 of the claim. It is unclear as to what this angle is in respect to.
- The claim recited “a third plane” in line 4 of the claim. It is unclear as to what this third plane is. Further, the claim does not recite any second plane.
- Finally, as best understood, the claim does not directly correspond to the Applicant’s invention. For example, as seen in Figure 4A of the application, slanting part 220, while at an angle with respect to piping part 230, is nevertheless in a same plane as piping part 230. In fact, all the piping appears to be on a same plane (i.e., the X-Z plane of the piece of paper). Clarification on all of these matters is required.

Art Unit: 3744

As per claim 2:

- The claim recites “changed at” in line 4 of the claim. Similarly as regarding claim 1, the claim should positively recite the structure of the apparatus, not the fact that it has been changed from something else.

As per claims 3-8, these claims are rejected since they depend from rejected claim 1.

Due to the multiple issues raised regarding claim 1, the Examiner is unable to definitively examine the claim on the merits. Accordingly, claim 1 and claims 3-8 which depend therefrom have not been examined on the merits at this time. Since the issue raised above regarding claim 2 is straightforward, claim 2 is examined on the merits below.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 2 is rejected under 35 U.S.C. 102(b) as being anticipate by Frank et al.

As per claim 2, Frank et al. discloses a vertical piping part 19 wound in an up and down direction, and horizontal piping part 22 connected thereto via slanted angle piping 21 (see Figure 4; column 3, line 58 – column 4, line 2).
